

Missing Chart Detail

PROBLEM SOLVING · THREE ENDINGS

Felix opens the class project group chat and sees three new replies. His earlier message said, "Add the chart to the slides, please." The group has two charts, one about cafeteria trash and one about bus delays. The pinned checklist names the slide owners, but not the chart files. The slide editor asks which chart, then the chat drifts into font arguments. Felix needs a choice that fixes the missing detail without restarting everything.

Choose the ending most likely to work, and state what happens next.

- [ ] Felix replies, "Use the chart from the survey," and waits for the editor to figure out which file matches it.
- [ ] Felix posts one clear correction: "Use the cafeteria trash chart on slide 4; leave the bus chart for the conclusion."
- [ ] Felix adds a chart himself, then tells the chat it is handled, even though the editor still may not know which plan changed.

Answer: 2

Think about it: What information makes a group chat request easy to act on?

TEACHER NOTE

The best answer is ending 2 because it supplies the missing detail and gives the editor a clear action. A strong response predicts that the editor can place the correct chart and the group can move on. Endings 1 and 3 are plausible, but they leave either the file or the group plan unclear.

3andB makes printable workbooks for the same classrooms these are written for.
