

Care Chart Mix Up

PRACTICAL SKILLS · PUT IT IN ORDER

Cora studies the class pet's care chart beside the guinea pig cage. The weekend food plan changed to the green tray today. The afternoon helper still sets out the old seed scoop. No one told the helper, and the carrot clip sits on Thursday. Cora must close the chart and put supplies away.

Put the steps in the best order.

- [ ] Put the old seed scoop back on the care shelf.
- [ ] Check the care chart for the newest Friday plan.
- [ ] Tell the afternoon helper the weekend food moved to the green tray.
- [ ] Mark the chart to show what is finished and what carries over.

Answer:

1. Check the care chart for the newest Friday plan.
2. Tell the afternoon helper the weekend food moved to the green tray.
3. Mark the chart to show what is finished and what carries over.
4. Put the old seed scoop back on the care shelf.

Think about it: Which step keeps the old food plan from happening again?

TEACHER NOTE

Correct order is 2, 3, 4, 1. Cora should check the newest plan, tell the helper, mark the chart, and then put away the old supply. This order fixes the changed plan before the materials disappear.
