

Poster Time Check

TIME MANAGEMENT · HOW LONG WILL IT TAKE

David has 30 minutes before his group meets. His group agreed he would bring the poster board ready. He also wants to add neat labels before the meeting. If everything will not fit, he can save labels for the group.

Add the minutes and decide whether David can finish all the tasks in time.

TASK	MINUTES
Gather poster board and supplies	5
Measure and draw big sections	12
Cut out pictures from the packet	10
Glue pictures in the right spots	8
Make neat labels	9

Time available: 30 minutes

Answer: 44 minutes — they do not fit

Think about it: Why is adding the time before starting useful in this situation?

TEACHER NOTE

The total is 44 minutes, so David cannot finish all the tasks in 30 minutes. A strong answer says he should finish the board setup first and save labels for the group. Other answers are acceptable if they use the time total and name a reasonable task to save for later.

3andB makes printable workbooks for the same classrooms these are written for.
